Remarks

In response to non-entry of the previous amendment, applicant has submitted a revised claim amendment section that includes a listing of all pending claims including the withdrawn claims.

As applicant stated in the previous amendment filed May 16, 2005, applicant reserves the right to present withdrawn claims 12 to 36 in a divisional or continuation application.

In response to the outstanding restriction requirement applicant has elected to proceed with the memory device claims. Previous independent claims 12 and 25 have been presented as new claims 37 and 49 with amendment to include the limitations of previous dependent claims 23 and 35, which have no counter part in the new claims now presented. By virtue of the amendments, applicant has elected to proceed with the claims previously presented as claims 23 and 24 and claims 35 and 36.

Favourable consideration is respectfully requested.

Respectfully submitted,

Terry L. Leier, Reg. No. 41, 554

Dated: May 31, 2005
